

Shifting VMware Causing Concern? Migrate to AWS Easily with nClouds!

Map out your ideal approach for migrating VMware to AWS with nClouds' Migration Readiness Assessment.

VMware customers pay more to get less.

In the wake of Broadcom's recent VMware acquisition, many VMware customers are experiencing serious and troubling increases in costs.

Fewer and leaner products are available through VMware.

Current customers are forced into costly subscription bundles.

Price hikes are anywhere from 150% to 1,200%.

AWS and nClouds to the rescue!

As an AWS Premier Tier Services Partner, nClouds is working with AWS to provide significant support and funds to incentivize VMware customers to migrate their environments to AWS.

Your Partner for Seamless Migration

Migrating from VMware to AWS presents its own concerns about maintaining performance and security standards. As an AWS Migration Services Partner, nClouds is ready to step in and help craft a cloud migration strategy customized to your business.

We have a proven record of delivering comprehensive and successful AWS solutions for organizations in a range of industries and of all sizes, from startups to enterprises.

Experience

We bring more than a decade of experience with AWS to your team. nClouds has done over 250 DevOps AWS implementations, deployed more than 500 pipelines, and managed more than 10,000 servers.

Skills

Our team has honed our cloud migration skills across a broad range of projects, from rehosting (lift and shift) to replatforming (lift, tinker, and shift) and full refactoring/re-architecting solutions that move workloads from single-tenant, on-premises to multitenant, public cloud. What's more, we apply powerful automation techniques, infrastructure-as-code (IaC), and containerization strategies to complete migrations faster and with lower risk.

Cloud Migration Credentials

We're a team of expert AWS migration consultants with numerous accolades and certifications.
